

## WinGrodan 2/Swimify users should now use support.swimify.com

2024-02-27 - Erik Fornander - Comments (0) - General

WinGrodan 2/Swimify users should start using using <https://support.swimify.com> to download the software and also to get support for the software instead of using this site support.iccm mediasport.com.

In the future you will not be able to download WinGrodan 2/Swimify software from [support.iccm mediasport.com](https://support.iccm mediasport.com).

The sites [support.swimify.com](https://support.swimify.com) and [support.iccm mediasport.com](https://support.iccm mediasport.com) uses the same user system so you should have the same login when you go to [support.swimify.com](https://support.swimify.com) as you do on [support.iccm mediasport.com](https://support.iccm mediasport.com).

If you do not remember your login and password for our support sites then you can click the link called "Need a password reminder?" as seen in the image below.
